**Trading with Russia – essential exporting guide,
business opportunities and meeting experienced trade
specialists**

Russia is not as difficult a market as some make out, and small manufacturing companies in particular will benefit from taking a closer look. You do not have to be a seasoned exporter to access this market, where margins are generally far higher than in Western Europe.

Russian companies have a good history of paying on time, and payment can sometimes be received in advance. Many problems that people associate with Russia have been resolved; others were exaggerated, and others irrelevant or simply untrue.

Come and join the Chamber and meet with key industry specialists who will provide:-

- A briefing on the opportunities and challenges for UK companies looking to trade with Russia
- Make new contacts, swap experiences with other companies doing similar things
- Expert advice on doing business with Russia, including sourcing opportunities, cultural differences, getting paid, routes to market, product certification
- An update on the latest economic situation
- Opportunity to have a one-to-one meeting with the experts and speakers
